

cardiolife AED

Automated External Defibrillator

AED-2100K

Fighting Disease with Electronics

 **NIHON KOHDEN**

Only 3 steps to save a life

Step 1. Turn on the AED

When you turn on the power, the lid opens automatically.
Simple voice instructions guide you through the entire procedure.

Step 2. Attach the electrode pads

AED pads are pre-connected, and there is no need to distinguish right from left.
You just remove the backing and press them onto the patient's chest.

Step 3. Press the shock button

After you attach the pads to the patient's chest, analysis starts automatically.
If the AED indicates that defibrillation is needed, you just push the blinking shock button. Anyone can save a life!

Self test for reliability The AED has a self check function with daily and monthly tests.

System Test

Indicates current operation
with green and red signals.

Battery Test

Indicates remaining battery
life and possible trouble
points.

Pads Test

Nihon Kohden pad connectors have special technology*
to check and indicate the pad condition.
*patent pending

Automated External Defibrillator
AED-2100K
